This bibliography has been prepared as a result of an increasing number of requests for information on the problems caused by synthetic detergents in water and waste treatment plants and in surface and underground waters as well as on analytical methods for synthetic detergent components and the physiologic effects of such materials. While it is not exhaustive it does contain references to most of the published literature in this field through June 1964.

Those articles which have been abstracted in Water Pollution Abstracts or in Chemical Abstracts include the reference to these journals following the source reference.

This bibliography has been compiled by Mr. Francis L. Evans III, Sr. Assistant Sanitary Engineer and Mr. Jesse M. Cohen, Supervisory Chemist, and Dr. Sidney A. Hannah, Chemist, Engineering Section, Basic and Applied Sciences Branch, Division of Water Supply and Pollution Control, U. S. Public Health Service.
